

2024 Local Government Election - Sunshine Coast Council Candidate Questionnaire Responses

Candidate Name	Camillo Primavera
Nominating for	Councillor
Which division for?	Division 10
Sunshine Coast Dark Sky Reserve	From what I have read it seems like a great idea, but like all proposals it needs lots of community consultation to look at the pros and cons of the project.
Do you support the Sunshine Coast Dark Sky designation?	Yes
Circular Economy	The idea is great but ultimately, it is part of the UN/WEF agenda on climate change and a climate emergency which is proven to be a hoax and part of a global plan for population control.
Do you support the strategy?	No
Biosphere designation	As above all seems great but its all part of a global plan/agenda that is not good.
Will you actively promote our Biosphere Aims and Objectives?	No
Inter-Urban Break	My understanding is it protects our precious wildlife, flora and fauna and makes available certain areas for the public to enjoy our beautiful region.

Do you support it's protection?	Yes
New Planning Scheme	I'm not familiar with all the planning scheme proposals so I wont comment, I believe that its in the process of being amended.
Will you uphold the Community Planning Priorities?	Yes
Climate and Renewables	<p>The key impacts are the huge amount of Council funds that are being wasted on dealing with a problem that eminent scientists from around the world, including Australia's renowned Emeritus Professor Ian Plimer, have proven doesn't exist. I do not endorse the Council's Climate Emergency Declaration. There is no emergency. They should stop wasting ratepayer's money with their nonsensical virtue-signalling.</p> <p>I support emission controls in built up areas to reduce air pollution. This may include electric or hydrogen powered buses and other public transport. But I don't support any controls that are aimed at reducing CO2 emissions. CO2 is not a pollutant and does not cause global warming. No one has ever proved that it does. Furthermore CO2 is an essential plant food and it's at a historically low level. The more atmospheric CO2 there is the better all plants grow, and they are the essential food source for all life. I believe that the Climate Emergency is a Global scam. There have been several ice ages in the past, interspersed by periods that were even warmer than today. This occurred long before fossil fuels were ever used by mankind. During the warmest periods the natural environment of plants and animals (including humans) flourished. In addition, records show that sea levels have been much higher than they are now, and much lower too. Sea levels recorded at Fort Denison in Sydney Harbour, starting in 1885, show that levels have risen only 210mm (approx. 8 inches) in 137 years!</p>
Do you support Nature based Solutions for climate resilience?	Yes

Sunshine Coast values	Continue promoting the region and making sure all stakeholders do there job.
Do you support the use of non-lethal shark deterrent methods in our oceans?	Yes
Will you advocate to manage population growth to protect and restore the region's ecological and liveability values? Liveability definition from SCRC new planning scheme preliminary documents - Liveability is the sum of the factors that add up to a community's quality of life now and in the future, including the built and natural environments, economic prosperity, social stability and wellbeing, equity and access, education, cultural and recreation opportunities.	Yes
